

Poor IT Monitoring Hampers Business Growth

Our recent survey of global senior IT executives revealed that...

2 out of 3 have made changes to underpin digital infrastructure

...But **48%** still don't see the value of IT Monitoring

15% think it's a cost center

20% think it's an un-strategic afterthought

8% aren't monitoring the right things

As a result 52% are unhappy with their IT infrastructure

25% have systems that don't communicate - preventing full system visibility

21% believe that legacy systems prohibit scalability and growth

78% don't have fully aligned digital integration between IT and business strategy in terms of digital transformation

A Single Pane of Glass Provides Unified Insight

Overcomes decentralized, siloed systems

Enables business growth and innovation

Provides visibility to drive digital transformation

Turns IT into a strategic hub instead of a cost center

Spots early warning signs of system failure
